

Your name: _____

Class Period: _____

The names of your other group members: _____

Summative Reflection Form

Objective: Engage in an independent yet technologically-interactive learning opportunity to explore the mystery of Poe's Death. Determine a cause of death while exploring others' research, and conduct a campaign to convince others that your theory is the correct one by referring to specific factual evidence *and* by making your own interpretations.

1. What were some new things that you learned about Poe while working on this project? (Name at least 2)
2. What were some things that you learned about yourself or others while working on this *group* project? (Name at least 1)
3. What did you find to be the biggest challenge while working on this project?
4. What was the "easiest" thing you had to do while working on this project?
5. Did you enjoy this project? (*Was it "fun"?!)* Why or why not?
6. Would you recommend that I do this project again with future students? If so, what changes should be made, if any?
7. Read the objectives again carefully. Do you feel that you—individually—met each one of those objectives? Explain **how**.
8. Describe your experience in working with your group. For example, did everyone get along? Did everyone share responsibilities and equal amount of work? What did you, personally, contribute to the group project?
9. Is there anything else you'd like to share about how your group worked, or your overall experience?
